

WINDHAGER

HOME & GARDEN

INSECT PROTECTION WITH SYSTEM PRODUCT CATALOGUE

2025

A modern dining table with two chairs in front of a large window with vertical blinds. The table is round and light-colored, with two dark grey chairs. A vase with green plants sits on the table. The window has vertical blinds and looks out onto a garden with trees and a lawn. The room has light-colored walls and a light-colored floor.

FLEXIBILITY TO SUIT YOUR LIFESTYLE

- ... the perfect solution for every door and window.
- ... flexibly adaptable to your lifestyle and living situation.
- ... developed in Europe
- ... whether it's advice, accessories or spare parts you need, you'll find we have it all!
- ... whether you are looking for a self-assembly kit or a custom-made solution, we have the perfect solution for you.

VENTILATE WHEREVER YOU NEED IT

Available for windows, skylights and balcony and patio doors, Windhager insect protection solutions allow you to ventilate without being disturbed by insects.

SLEEP PEACEFULLY

Protect yourself and your family without using chemicals! On balmy nights it can be wonderful to sleep with the window open. Installing insect screens will ensure that you aren't kept awake by buzzing flies or mosquitoes, etc. or worse still their bites.

ENJOY FOOD

Protect windows and doors with fly screens. You will be able to cook and eat in peace without having to miss out on fresh air. Because wasps and flies love our meals just as much as we do.

WINDHAGER - A FAMILY COMPANY FROM AUSTRIA

TOP QUALITY & PERSONAL SERVICE

The secrets of our success are our partnerships with trading partners and suppliers and the best products for home and garden. From pest repellents to sun sails and privacy screens to a wide range of garden items, we are always developing new solutions for our customers. What particularly sets us apart are our outstanding insect protection products!

PERSONAL

As a family firm with over 40 years' experience, Windhager is a customer-oriented business offering products you can rely on.

THOUGHT OUT

Whether it's a classic or market-oriented innovation: Our products offer customers great benefits and meet the highest demands.

DIVERSE

The Windhager range includes ingenious and creative solutions for many challenges around the house and garden.

SKYLIGHTS

Special solutions to keep attic rooms mosquito-free.

WINDOWS

plastic, aluminium or wood; drilling, screwing or sticking; fly screens, pollen protection mesh or sun protection - the options are endless!

LIGHT SHAFTS

Light shafts also need to be protected from mosquitoes, spiders and insects.

PRODUCT LINES

FLOOR-TO-CEILING WINDOWS

Floor-to-ceiling windows require specially designed fly screens.

INSECT STOP PLUS

- Attractive cost-benefit ratio
- **5-year warranty** on aluminium frames*
- Wide range of products
- Pollen protection solutions

INSECT STOP EXPERT

- Professional quality
- **10-year warranty** on aluminium frames
- Perfect View fibreglass mesh (except pleated)
- Double door solutions

SUN STOP COOL

- Special sun-protection mesh
- Blocks out up to 70% more sunlight, thereby keeping the indoor temperature down → tested by ift-Rosenheim
- **5-year warranty** on aluminium frames*
- Mesh can also be inserted into fly screen frames already purchased

DOORS

Our wide range of insect protection products means there is a solution for every door, be it a standard fly screen or a custom-made insect screen.

* except roller screens (10-year warranty)

WHAT MAKES US SPECIAL:

PRODUCT DEVELOPMENT IN AUSTRIA

We develop our products at our headquarters in Austria. Regarding production we take a diversified approach, manufacturing some products in-house, while others are manufactured by selected suppliers. This strategy allows us to ensure the highest standards of functionality and quality in both design and production.

WE ARE HERE FOR YOU

Tried-and-tested assembly instructions and installation videos in many languages guide you to the finished product. If you have any questions, contact our support website or customer service for help, by phone or email.

WE OFFER SPARE PARTS, WITH WARRANTIES

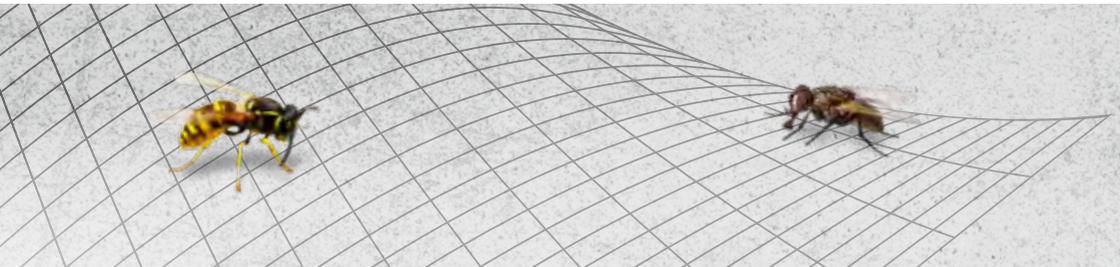

All the components in our DIY kits are available separately from our customer service to replace a damaged or defective part. Even after a product is replaced by a new version, spare parts remain available for existing products.

ADJUSTABLE INSECT SCREEN

Our solutions can be expanded and customised with a wide range of accessories: from additional brush seals to clamp hinges and special meshes (pet-proof mesh, or pollen mesh).

SUSTAINABILITY AND SOCIAL RESPONSIBILITY ARE IMPORTANT TO US

That's why we require all suppliers to have amfori BSCI certification to guarantee employee rights are protected. Our products of course comply with the REACH regulation (EU Chemicals Regulation). Our insect protection products are certified with the 'Blue Angel' environmental label. Our retail packaging is largely FSC-certified, i.e. the cardboard and paper is sourced from sustainable forests. Where possible, we avoid the unnecessary use of plastics in retail packaging. Our products are also for the most part recyclable and reusable at the end of their life cycle.

PERFECTLY INFORMED. AT HOME, ON THE MOVE OR DIRECTLY IN THE DIY STORE.

GO TO THE WEBSITE

<https://windhager.eu> and search for the relevant item number or product name, or scan the QR code on the packaging.

DETAILED INFORMATION AND INSTALLATION VIDEOS

Of course, we also provide you with all relevant information online: operating instructions, installation videos and detailed technical information such as installation depth, mesh size, and care instructions.

You can even find **step-by-step installation instructions**, with an integrated measurement calculator at <https://windhager.eu>

WE ARE ALWAYS THERE FOR YOU!

If you have any questions about the product or assembly – feel free to contact us free of charge:

from Germany 0800 6161 123,

from Austria 0800 080616,

from Switzerland +41 4176 6054-0

OUR SALES SOLUTIONS

The development of both POS solutions and the consistent fulfilment of customer needs are our central concerns.

OUR PRODUCTS PERFECTLY STAGED AT YOUR STORE!

ALL IN ONE

We offer an extensive product range including POS presentation „from one single source“, which will save you the hassle of several suppliers, therefore saving you valuable time.

INDIVIDUAL VARIETY

We provide you with a selection of displays and secondary placements so that the desired POS option corresponds with the relevant market requirements.

ELECTRONIC SUPPORT

We provide a modern planogram software to facilitate planning and profitability analyses of shelf assembly.

OPTIMAL PRODUCT PRESENTATION

Our ready-made POS concepts allow for an extensive product range. A clear, informative design as well as striking example boards help the end customer choose their ideal product.

BROCHURES FOR END CUSTOMERS

Brochures are included at the respective secondary placements to further promote the POS. They contain detailed product information and a wide range of applications for the end user.

INNOVATIVE, MODERN, EFFICIENT – YOUR INSECT SCREEN BY WINDHAGER

PACKAGING WITH SYSTEM

- orange: Insect Stop PLUS
- anthracite: Insect Stop EXPERT
- blue: Sun Stop COOL
- accessories: PLUS/EXPERT

✓ PICTOGRAMS

Symbols on all packaging to help locate and compare products.

✓ TEXTS & INSTRUCTIONS

Product texts in 26 European languages; assembly instructions in text and picture with reference to the assembly video in national language with country code.

HOOK AND LOOP TAPE FLY SCREEN

Affordable, quick and easy to install. Thanks to the hook and loop tape, the frame can be removed without leaving any residue. Perfect for rental apartments.

FRAMED SCREENS

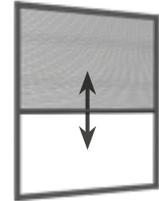

Sturdy and yet quickly assembled. No drilling required to install. Easily cut to size to fit most windows.

PRODUCT OVERVIEW WINDOWS AND DOORS

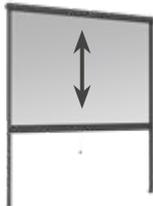

PLEATED WINDOW SCREEN

Space-saving, drill-free installation with all has all the advantages of a roller screen. Perfect for all windows that are frequently opened, to water plants for example. Or for windows where the fly screen is only used sporadically and needs to stay out of sight when not in use.

ROLLER WINDOW SCREEN

Sturdy, high quality, quick to open and close – even with one hand. The fabric disappears into the cassette where it is effectively protected when not in use. The optimum solution for heavy use.

SKYLIGHT SCREEN

Perfect for roof windows: Hook and loop tape fly screen, roller and pleated screens that protect against sunlight and mosquitoes.

ANTHRACITE
WHITE

PROFILE
COLOURS

DOOR CURTAIN

Space-saving, economical and simple. Works wherever the installation depth is too small for other solutions. Also ideal for households with children and animals, as they can just walk straight through it - and with no risk of damage.

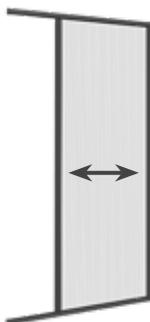

FRAMED DOOR SCREEN

Sturdy, perfectly transparency model, with an unobtrusive design. It is not for nothing that it has become a classic for single-leaf balcony and patio doors.

PLEATED DOOR SCREEN

The space-saving solution for patio and balcony doors. Pleated door screens can also be installed in limited installation depths and are suitable for single and double doors. Will stay open in any position.

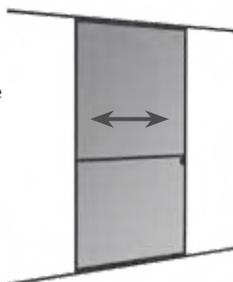

ROLLER DOOR SCREEN

Inconspicuous when not in use, effective when closed. When opened, the roller screen disappears into a protective cassette. Perfect for all doors without the space for swing and sliding versions.

SLIDING DOOR SCREEN

Space-saving and stable - extremely flexible, the ideal solution for large doors: can be opened from both sides and can also be fitted behind roller shutters.

HINGED DOOR SCREEN

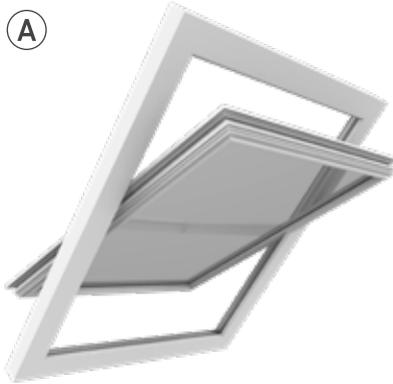

Swinging inwards or outwards? Why not both? Hinged door screens can be opened both ways - no need to have even one hand free. Perfect for often-used doors, as well as households with animals and children.

WINDOW & DOOR MODELS

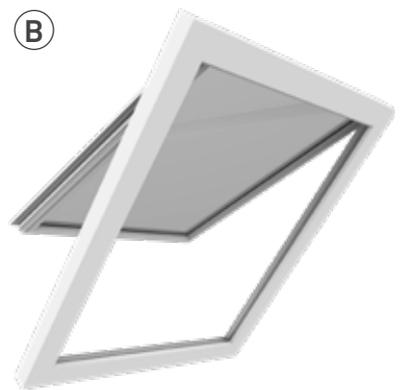

When choosing an insect screen, it is important to determine your window or door type. To do this, simply compare the illustrations with your window/door.

The product overview and the tables starting on page 14 describe in detail which product is suitable for particular windows/doors.

COOL

Effective insect protection meets cooling sun protection!

COOL products with "Sun Stop mesh" provide effective sun and insect protection for your home. Some fly screens are equipped with the equally effective "Sun Reflection" mesh. The specially coated polyester mesh - black on the inside, silver on the outside - reflects up to 50% of the sun's rays. Rooms therefore remain shaded and cool.

The mesh also provides reliable **protection against insects**: your home stays safe. Crawling and flying insects cannot find a gap in the fabric and have to stay outside. The fly screen mesh has been awarded the **"Blue Angel"** label in the "Repelling and combating pests without the use of toxic substances" category.

And at the same time, COOL products offer **heat protection**: The sunlight is immediately blocked so that it cannot shine with full force into your living space.

The dark, tightly woven fibreglass mesh allows less sunlight and heat through, keeping rooms cool. The mesh reduces the dazzling effect of the sun as well as heat generation by reducing transparency by up to 70%. Also helps prevent eye strain when using a computer or watching TV in front of the computer and TV.

SUSPENDED ROLLER BLIND

Suitable for
**Window models
1, 2 and 3**

See p. 13

- Complete DIY kit made of extruded, powder-coated aluminium profiles
- Fibreglass fly screen fabric, completely weather- and tear-proof
- Drill-less, clamp-less installation by means of adjustable suspension spring incl. practical bending template
- Integrated roller blind brake prevents uncontrolled recoil of fabric
- Height-adjustable handle rail for comfortable operation
- Sealing brushes for all-round protection
- Frame size can be adjusted to fit
- Space requirement (installation depth): 38 mm

Drill-less installation by means of suspension springs

Can be opened and closed at any time

Incl. bending aid

ROLLER BLIND WINDOW

Suitable for
Window models
1,2 and 3

See p.13

- All-in-one kit with extruded, powder-coated aluminium profiles
- Fibreglass fly screen fabric, completely weather and tear-proof
- Clamp mounting in the wall reveal without drilling and screwing
- Frontal mounting on window frame possible (accessories included in kit)
- Easily adjustable tensioning force of the roll spring, with recoil protection for more comfort
- Unique anti-wind brush for attaching the fibreglass fabric to the guide rail - even under strong wind pressure
- Size individually customisable
- Required space (installation depth):
Screw mounting: 42 mm
Clamp mounting: 82mm

Drill-free clamp mounting

Integrated brush for protection against strong winds

Easy tensioning of the closing spring

DOOR DRAPE

Suitable for
**Door models
1,2 and 3**
See p.13

- Lamella curtain made of four overlapping polyester sheets
- With pre-assembled weighting strips
- Easy fastening with velcro and protective tape
- Can be removed at any time
- Width and height individually adjustable
- Required space (installation depth): 5 mm

Art. No.	EAN	Size	Colour	PU
03792		100 × 220 cm	white	1
03793		100 × 220 cm	anthracite	1

MAGNETIC DRAPE

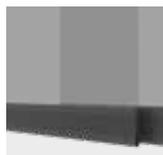

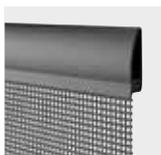

Suitable for
**Door models
1,2 and 3**
See p.13

- Lamella drape comprised of two polyester sections
- Invisible, integrated magnetic strips ensure silent closing action
- Can be cut to size at top and bottom, hemmed at the bottom for a nice finish
- Affixed by means of a velcro strip on the outer door frame
- Can be removed at any time
- Space requirement (installation depth): 5 mm

Art. No.	EAN	Size	Colour	PU
03526		110 × 220 cm	anthracite	1

DOOR DRAPE "EASY"

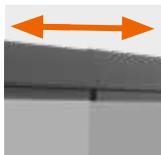

Suitable for
**Door models
1,2 and 3**
See p.13

- Lamella drape consisting of three (03781) or four (03782) overlapping fibreglass sheets
- With weighting strips
- Easy fastening due to self-adhesive plastic profile
- Removable at any time due to velcro fastener
- Width and height individually adjustable
- Required space (installation depth): 8 mm

Art. No.	EAN	Size	Colour	PU
03781	 9 003117 037816	95 × 220 cm	anthracite	1

DOOR DRAPE "TELESCOPE" PVC

Suitable for
**Door models
1,2 and 3**
See p.13

- Door curtain made from four overlapping lengths of fibreglass
- Comes with weighting strips
- Easy adhesion or screw mounting using PVC clips
- Removable at any time due to screw mounting
- Size individually telescopic
- Required space (installation depth): 17 mm

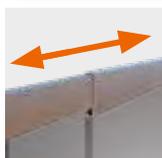

Art. No.	EAN	Size	Colour	PU
03612	 9 003117 036123	120 × 250 cm	anthracite	1

NEW

DOOR DRAPE "TELESCOPE" ALU

Suitable for
**Door models
1, 2 and 3**
See p.13

Telescopic
aluminium profile

"Soft Stop" ensures
silent closing

- Largely pre-assembled
- Telescopic aluminium profile
- 4 fibreglass slats
- incl. weighting strips with 'soft-stop' function
- Can be shortened individually
- Telescopic width adjustment
- Drill-free installation
- Removable at any time

Fastening using
hook and loop tape

FRAME DOOR

Suitable for
**Door models
1,2 and 3**
See p.13

- All-in-one kit with extruded, powder-coated aluminium profiles with an additional groove for add-on parts such as hinges
- Robust, weather resistant fibreglass fly screen fabric
- Self-closing hinges (spring integrated in the housing), for screwing
- Magnets keep the door closed
- Full-length handle rail with tissue protection, inside with comfortable grip flap
- All-round sealing brushes for complete protection towards the door frame
- Stable aluminium step profile, screwed with the frame for greater stability. Floor brush for retrofitting (accessory Z26) to protect against crawling insects for e.g. barrier-free doors
- Required space (installation depth): 16 mm
- Suitable for common balcony and terrace doors
- 2 mounting types: screw mounting (fixing material included) or clamp mounting (with a mounting frame, item no. 04518/04519)

Handle rail with tissue protection

Robust corner connectors

Stable aluminium step profile

Optional accessory assortment

TELESCOPIC FRAME DOOR

Suitable for
**Door models
1 and 2**
See p.13

Extendable to the
desired size

Self-closing and
self-lifting hinges

Robust corner
connectors

All-round sealing
brushes for com-
plete protection

- All-in-one kit for a telescopic insect screen door
- High-quality, powder-coated aluminium profiles; extendable to the desired size (min. WxH: 70 x 180 cm / max. WxH 95 x 206 cm)
- Tear-resistant, weatherproof fly screen fabric made of fibreglass
- Saw-less! Pull profiles apart or push them together; the frame is fixed in place by attaching the clamping bars
- Self-closing and self-lifting glass fibre reinforced hinges, for screwing
- Magnetic strips keep the door closed
- All-round sealing brushes for complete protection towards the door frame
- Full-length aluminium handle profile, inside with additional handle flaps
- Required space (installation depth): 20 mm
- Suitable for both flush-mounted and offset doors

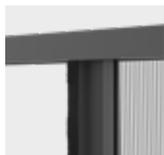

Art. No.	EAN	Size	Colour	PU
04516		100 x 210 cm	white	1
04517		100 x 210 cm	anthracite	1

RETRACTABLE PLEATED FRAME DOOR

Stable aluminium profiles

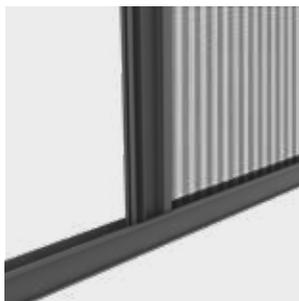

Full-length handle with sealing brush

Velcro flap mounting or screw mounting

High-quality pleated polyester fabric

Suitable for
**Door models
1 and 2**
See p.13

- All-in-one kit for a retractable pleated insect screen for doors
- Stable frame made of high-quality, powder-coated aluminium profiles
- Robust, durable polyester fabric in pleated form; UV-resistant, light and air permeable.
- Full-length aluminium handle profile ensures comfortable opening and closing from both sides
- Practical - the door can be stopped in any position
- Sealing brushes for complete protection towards the door frame
- Door size can be individually adjusted; height can be shortened up to 180 cm
- Required space (installation depth): 26 mm
- Suitable for both flush-mounted and offset doors
- 2 mounting types: drill-free Velcro flap mounting or screw mounting (fixing material incl.)

INSECT SCREEN WINDOW

Art. 04514/04515

Foldable swivel handle

Robust corner connectors with cut edge cover

Drill-less fastening

Optional accessory assortment

Art.Nr. 04514/04515

- Extra high insect screen window with an additional center profile
- Ideal size for floor-to-ceiling windows with French balcony
- Drill-free fastening with height-adjustable stainless-steel suspension springs

Suitable for
**Window models
1, 2 and 3**

See p.13

- All-in-one kit with extruded, powder-coated aluminium profiles with screw channel for handles and suspension springs
- High stability due to fiber-reinforced corner connectors with cut edge cover and aluminum profiles
- High-quality "Perfect View" fiberglass fabric for even better visibility, absolutely weatherproof and tearproof
- User-friendly swivel handle, which when folded out makes installation easier and when folded in does not disturb the view
- With sealing brush at window frame, all-round for continuous protection
- Flexible rubber piping for easy fixation of the fabric in the frame
- Frame size individually adjustable
- Drill-less fastening with height-adjustable stainless-steel suspension springs incl. bending aid; for window frames measuring 8 – 30 mm
- Required space (installation depth): 14 mm
- Suitable for all types of windows including those with rain guard
- Elegantly designed internal corners allow mitre-cut profiles to be connected and ensure stability (accessory Z25, item no. 04546)

Both fabric rails
open

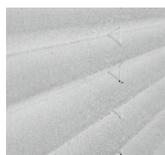

Insect protection
fabric application

Sun protection
fabric application

High-quality leated
insect protection

High-quality pleated
sun protection

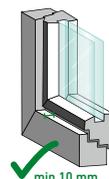

- All-in-one kit with extruded, powder-coated aluminium profiles
- Perfect insect and sun protection in pleated form (2in1)
- Insect protection fabric made of polyester, robust sun protection fabric made of PET
- Transparent and breathable insect protection fabric
- Both fabric types extremely UV-resistant enabling a long service life
- Parts can be used individually or together, height flexibly adjustable
- Size individually adjustable
- Required space (installation depth): 25 mm

Art. No.	EAN	Size	Colour	PU
03966		110 × 160 cm	white	1

PLEATED WINDOW ULTRA FLAT

Suitable for
Window model 2
See p.13

- All-in-one kit with extruded, powder coated aluminium profiles
- UV-resistant and weatherproof PES pleated fabric
- No drill, no screws fastening on the window frame with suspension springs
- Suitable for offset windows – minimum size mounting frame: 10 mm
- Can be opened and closed via handle bar
- Width and height of the frame can be individually shortened
- Required space (installation depth): only approx. 5 mm – ideal also for windows with close-fitting roller shutters

Extra flat installation depth

No drill installation on the frame

Suitable for windows with roller shutters

See p.13

SWING DOOR

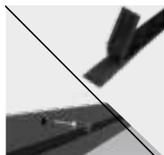

All-round profile groove for magnetic closer and sealing brush, sturdy aluminium tread plate

Continuous handle strips on both sides allow easy opening inwards and outwards

Self-closing swing hinges

Fastening by means of velcro strips or screw mounting

Suitable for
**Door models
1 and 2**
See p.13

- All-in-one kit for a fly screen door which opens inwards and outwards and closes by itself
- Perfect for frequently used passageways, can be operated by hand or foot thanks to the handle strip and the tread plate on both sides
- Sturdy frame made of powder-coated aluminium profiles, with all-round groove for magnetic closer and sealing brush, chamfered edges provide an attractive appearance
- Two mounting options: drill-free with velcro strips or fastening by means of screw mounting
- Impeccable view thanks to the high-quality "perfect view" fibreglass fabric in anthracite
- Self-closing and self-lifting glass-fibre reinforced hinges
- Magnets keep the door closed
- Low required space (installation depth): 15 mm

Perfect View fabric for even better visibility

SLIDING DOOR

Suitable for
**Door models
1,2 and 3**
See p.13

- All-in-one kit with extruded, powder-coated aluminium profiles
- High-quality Perfect View fibreglass fabric for even better visibility, absolutely weatherproof and tearproof
- Track rollers in the upper guide rail - no mess, easy to operate
- 2 mounting options: with continuous bottom guide rail or without barrier
- Can also be fitted with internal, invisible mitre-cut corners (accessory Z8)
- Flush-mounted aluminium handle, can be attached without drilling
- Two individual assembly kits can be used together for a double door

Rollers for easy handling

Barrierless access possible

- Frame size individually adjustable
- Required space (installation depth): 16 mm, double door: 32 mm

Two individual kits can be combined for a double door

Flush aluminium handle

OPEN-UP SUN PROTECTION FLY SCREEN

Suitable for
Window model 2
See p.13

- Fly screen with integrated sunblind for opening and closing
- Also ideal for windows with shutters, flower boxes etc.
- Black polyester fabric, reflecting on outside – reduces interior heat-up by reflecting sun rays
- Simple installation on window frame, can be removed at any time
- Space requirement (installation depth): 1 mm
- **INCLUDING** hook & loop-tape

Art. No.	EAN	Size	Colour	PU
03264		130 x 150 cm	anthracite/ silber	10

SUN & INSECT PROTECTION FOR SKY LIGHTS

Suitable for
**Window models
A and B**
See p.12

- Fly screen with integrated sunblind for sky lights
- Black polyester fabric, reflecting on outside – reduces interior heat-up by reflecting sun rays
- Integrated zip fastener allows for opening and closing of sky light without removing the fly screen
- Simple installation by means of self-adhesive velcro strip, can be removed at any time
- required space (installation depth): 1 mm
- **INCLUDING** self-adhesive velcro mounting tape

Art. No.	EAN	Size	Colour	PU
03268		130 x 150 cm	anthracite/ silber	10

MAGNETIC SUN PROTECTION TENTER FRAME

- Application: For all windows accessible from the outside to protect from sun and insects
- High-quality plastic and magnetic profiles ensure permanent attachment to the outside of the window frame
- Black polyester fabric, reflecting on the outside – reduces interior heat-up by reflecting sun rays
- Drill-less installation on outside by means of self-adhesive magnetic strips
- Magnetic frame can be removed at any time
- Size individually adjustable
- Optional flush handle can be attached to every corner
- Space requirement (installation depth): 10 mm

Suitable for
**Window models
1 and 2**

See p.13

Art. No.	EAN	Size	Colour	PU
03269		100 × 120 cm	white	1
03270		100 × 120 cm	anthracite	1

WINDOW SUN BLIND

- Special fibreglass fabric for flexible sun protection
- Reduces sun exposure and interior heat-up
- Drill-less attachment to window sash (glass or frame) by means of eyelets and adhesive hooks
- Can be removed at any time
- Can be sized individually

Art. No.	EAN	Size	Colour	PU
03253		100 × 120 cm	anthracite	1
03288		130 × 150 cm	anthracite	1
03299		120 × 220 cm	anthracite	1

SUSPENDED SUN BLIND

- Complete DIY kit made of extruded, powder-coated aluminium profiles
- Special fibreglass fabric reduces sun exposure and interior heat-up
- Drill-less, clamp-less installation by means of adjustable suspension springs incl. practical bending template
- Integrated roller blind brake prevents uncontrolled recoil of fabric
- Height-adjustable handle rail for comfortable operation
- Two sealing brushes for all-round protection even in strong wind
- Frame size can be adjusted to fit
- Space requirement (installation depth): 38 mm

Suitable for
**Window models
1, 2 and 3**
See p.13

Drill-less installation by means of suspension springs

Can be opened and closed at any time

TENTER FRAME SUN BLIND

Suitable for
**Window models
1 and 2**

See p.13

- Complete DIY kit made of extruded, powder-coated aluminium profiles
- High-quality fibreglass fabric reduces sun exposure and interior heat-up
- Drill-less installation by means of height-adjustable stainless steel suspension springs (blind frame thickness: 5 - 35 mm)
- Elegantly designed internal aluminium corners allow mitre-cut profiles to be connected and ensure maximum stability (accessory Z8)
- Suitable for all window types, even with weather boarding on blind frame
- With sealing brush at window frame, all-round for continuous protection
- Frame size individually adjustable
- Space requirement (installation depth): 14 mm

5-35 mm

Drill-less suspension spring, height-adjustable, suitable for depths from 5 – 35 mm

Flexible plastic handle

04599		Mitre box: 23 x 7 x 6 cm Saw: 250 - 300 mm	1

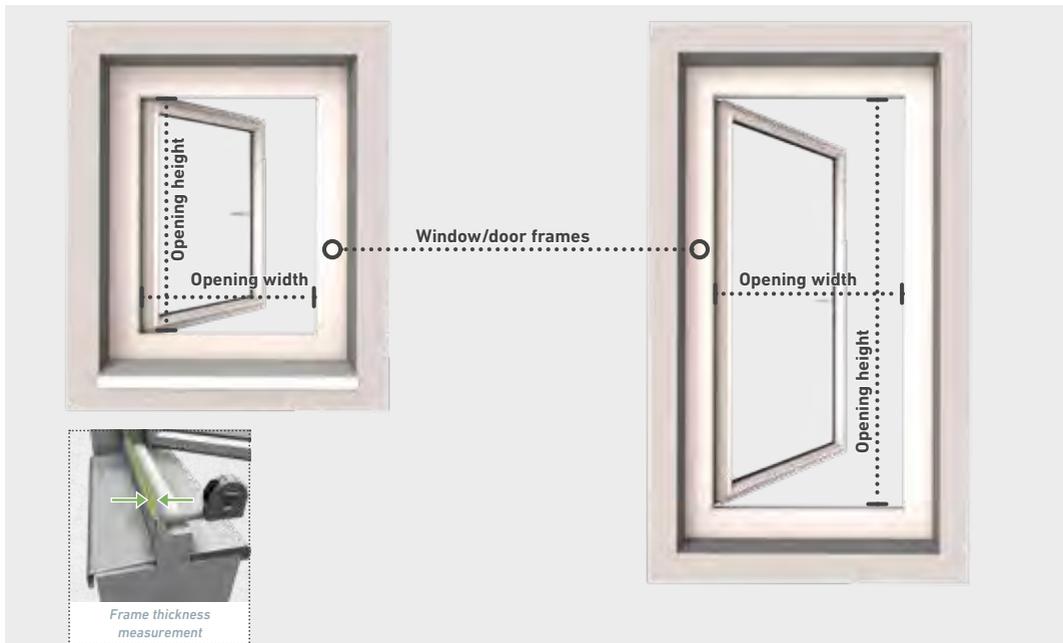

TAKING MEASUREMENTS CORRECTLY

FRAMED WINDOW AND DOOR SCREENS

Required dimensions: Opening width, opening height

The “Opening dimensions” are obtained by measuring the opening of the window/door frame (inside frame-to-frame measurement):

- from left to right for the “opening width”
- from top to bottom for the “opening height”

- ! For a secure, tight fit on the window frame, make sure there is an adequate installation/support surface around your opening:
- left 17 mm, right 17 mm,
top 35 mm and bottom 30 mm.

- ! For a secure, tight fit on the door frame, make sure there is an adequate installation/support surface around your opening:
- hinge side 37 mm, opposite side 25 mm,
top 45 mm and bottom 20 mm.
- For a barrier-free door with no door frame at the bottom, reduce the opening height measurement by 20 mm to avoid an overhang at the bottom.

TAKING MEASUREMENTS CORRECTLY

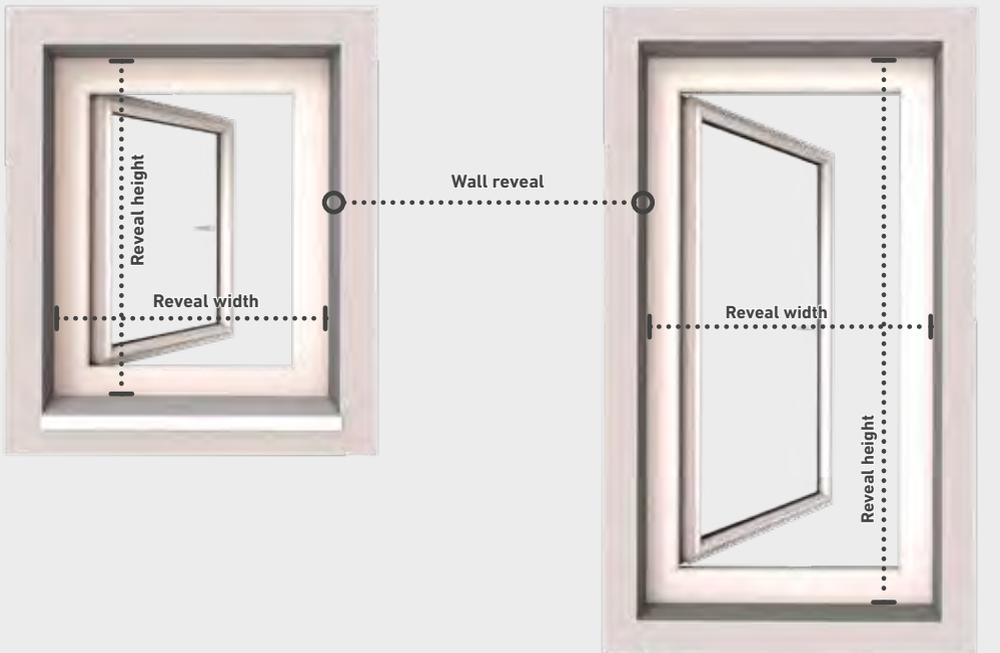

ROLLER WINDOW AND DOOR SCREEN, PLEATED DOOR SCREEN

Required dimensions: Reveal width, reveal height

The “**Reveal dimensions**” are obtained by measuring the wall-to-wall distance:

- from left to right for the “reveal width”
- from top to bottom for the “reveal height”

Tip: Measure the reveal at three points and use the smallest value.

TAKING MEASUREMENTS CORRECTLY

SLIDING DOOR SCREEN

Required dimensions: Opening width, opening height, reveal width, reveal height

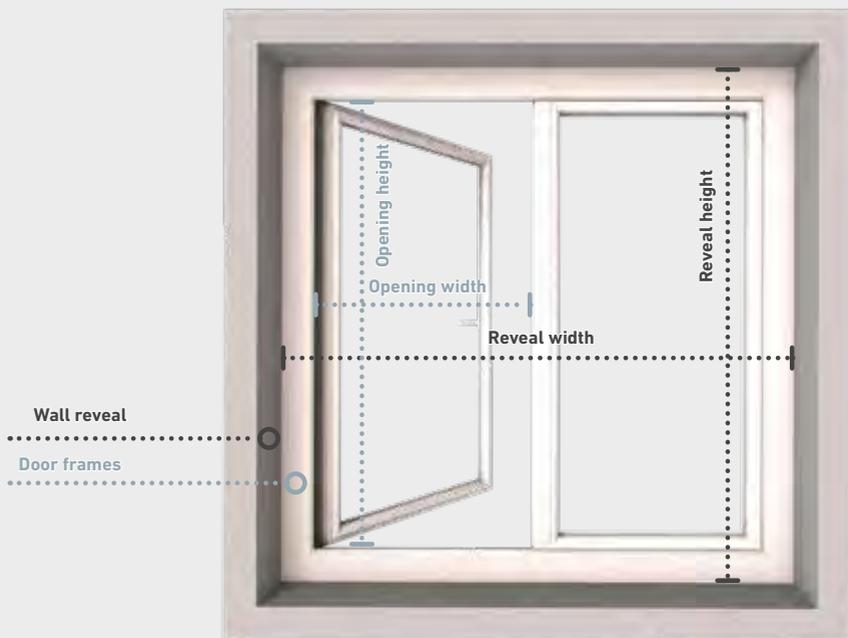

The “**Opening dimensions**” are obtained by measuring the opening of the door frame (inside frame-to-frame distance):

- from left to right for the “opening width”
- from top to bottom for the “opening height”

You get the “**Reveal dimensions**” by measuring the wall-to-wall distance:

- from left to right for the “reveal width”
- from top to bottom for the “reveal height”

Tip: Measure the reveal at three points and use the smallest value.
